Workshop 01 — Problem Safari

> Module 01 · Team & Foundations · 90 minutes

The 90 Minutes

Time	Block	What happens
10m	**Safari Briefing**	Rules: talk to 3+ strangers about frustrations, not ideas
30m	**Field Work**	LEAVE THE CLASSROOM. Talk to real humans on campus. (Rain plan: cafeteria, library, Mensa queue — anywhere with strangers)
20m	**Pattern Mining**	Share findings, cluster problems, find overlaps
20m	**Team Formation**	Form teams around shared problem passion
10m	**Problem Commit**	Each team defines top 3 problem hypotheses

Discussion Sparks

- “Did anyone find a problem they’d personally pay €50/month to solve?”
- “What surprised you most about what strangers complained about?”
- “Why is it so hard to leave the building and talk to people?”

Must Produce — Today’s Deliverable

Team formed + 3 problem hypotheses ranked by conviction

Kill criteria: Your team formed around a ‘cool technology’ instead of a real problem
