Homework — Module 04: Validating Problems

> This Week's Deep Work. Complete before Module 05 — or you're behind.

- [ ] **Before you drive traffic:** write your pass/fail threshold in the Toolkit (e.g. "≥10% visitor→signup, or we pivot the segment") — committed, dated, unchangeable
- [ ] Drive 100+ visitors via ads or direct outreach (keep the UTM source report — only target-segment traffic counts)
- [ ] Measure conversion rate (email signups or waitlist)
- [ ] Iterate headline/CTA based on first data

Module 05's data review opens with your pre-committed threshold read out loud, next to your actual number. No grading your own homework after the fact.
