Workshop 04 — Landing Page Sprint

> Module 04 · Validating Problems · 90 minutes

Pre-work (before you arrive): builder account created (Lovable/v0/Framer) · analytics account ready · your 3 sharpest interview quotes copied out · €50 ad budget source named (team cash or course budget — clarify in check-in).

The 90 Minutes

Time	Block	What happens
5m	**Examples**	3 great validation landing pages dissected
40m	**Build Sprint**	Copy FIRST (headline = your sharpest verbatim quote), then build: pain, promise, CTA, email capture
15m	**Copywriting**	Headline from customer language, CTA, social proof
15m	**Analytics + Ads**	Set up tracking, plan €50 ad campaign
15m	**Deploy + Share**	Go live, share URL, peer review each other's pages

Discussion Sparks

- "Your headline should be something a customer SAID, not something you THINK."
- "If you can't explain it in 6 words on a landing page, it's too complicated."
- "In 2026 there's zero excuse for not having a page live by end of class."

Must Produce — Today's Deliverable

Live landing page with analytics + ad campaign plan

Kill criteria: Your landing page describes features, not the problem it solves
