Workshop 06 — Show & Build

> Module 06 · Prototyping with AI · 90 minutes

The 90 Minutes

Time	Block	What happens
30m	**Demo Reviews**	TWO PARALLEL PODS · 3 min per team + 2 min brutal feedback — the math works for 12 teams
35m	**Live Build**	Instructor codes a feature live; teams build alongside
15m	**Cross-Testing**	Try each other's prototypes, report bugs + reactions
15m	**User Plan**	Name 10 specific non-friends to test this week

Discussion Sparks

- "If the demo takes more than 60 seconds to explain, the product isn't clear."
- "Show me, don't tell me. A working demo beats 50 slides."
- "What broke? What surprised you? That's where the learning is."

Must Produce — Today's Deliverable

Deployed prototype + feedback log + 10-person outreach list

Kill criteria: Your prototype is a Figma mockup, not a working product
