VENTURE LABS

Module 6

Show & Build

A joint initiative by

UNTERNEHMER TUM

WORKSHOP: The 90 Minutes

25m Demo Reviews

5 min per team: show prototype, get brutal feedback

35m Live Build

Instructor codes a feature live; teams build alongside

15m Cross-Testing

Try each other’s prototypes, report bugs + reactions

15m User Plan

Name 10 specific non-friends to test this week

Discussion Sparks

“If the demo takes more than 60 seconds to explain, the product isn’t clear.”

“Show me, don’t tell me. A working demo beats 50 slides.”

“What broke? What surprised you? That’s where the learning is.”

Today’s Deliverable

MUST PRODUCE:

Deployed prototype + feedback log + 10-person outreach list

KILL CRITERIA:

Your prototype is a Figma mockup, not a working product

This Week’s Deep Work

- Get 10+ non-friend users to try your prototype
- Log every reaction, bug report, and feature request
- Ship at least 2 fixes based on feedback

Complete by next session — or you’re behind.
