Workshop 08 — The Collison Installation

> Module 08 · Finding First Users · 90 minutes

The 90 Minutes

Time	Block	What happens
10m	**Target List**	Start from your Module 06 10-person outreach list and upgrade it: every name needs a real pain AND budget authority (or access to it)
20m	**Outreach Craft**	Write a personalized message for each person — name a real pilot price (€300–500 anchors; a €1 anchor kills you)
20m	**Sales Role-Play**	Practice asking for money. Out loud. With a partner.
20m	**Send LIVE**	Send all 10 outreach messages RIGHT NOW in class
20m	**Tracking + Objection Prep**	Replies won't arrive in-session: set up response tracking, write answers to the 3 objections you fear most, commit to 48h follow-ups

Discussion Sparks

- "If you can't name 10 specific humans, you have a fantasy, not a market."
- "The Collison brothers asked 'can I install this for you right now?' Do that."
- "Most technical founders have never asked anyone for money. That ends today."

Must Produce — Today's Deliverable

10 outreach messages SENT + response tracking started

Kill criteria: You sent 10 messages and got zero replies in 48 hours
