Workshop 10 — Feature Graveyard

> Module 10 · Product Management & Growth · 90 minutes

The 90 Minutes

Time	Block	What happens
10m	**Revenue Leaderboard**	Numbers on the wall: revenue, pipeline, best objection of the week
10m	**Backlog Dump**	List EVERY feature idea and request in your backlog
20m	**3-Question Filter**	Asked for? 10x better? Build by hand? Kill the rest.
15m	**Feature Funeral**	Publicly kill features. Celebrate the graveyard.
20m	**PMF Survey**	Send the Sean Ellis survey to ALL real users right now
15m	**Improvement Loop**	Read results honestly (n is small!) + plan next iteration

Discussion Sparks

- “If <40% say ‘very disappointed’ without your product, you have work to do.”
- “The best product decision is the feature you chose NOT to build.”
- “Dark mode is not a feature. It’s procrastination with CSS.”

Must Produce — Today’s Deliverable

Clean backlog + PMF score + improvement plan

Kill criteria: Your backlog has 20+ features and you can’t prioritize them
