Exemplars — what “good” actually looks like

Five synthetic-but-realistic artifacts at the quality bar the rubric rewards. **These are invented teaching examples** (labeled on every page) — two fictional teams, numbers made internally consistent. Your artifacts will look messier. That’s fine: the bar is **specificity, not polish**. Named humans, verbatim quotes, committed numbers, honest read-outs.

Artifact	Module	Team	File
Pain Map with budget column	M03	TurbineTrack	Exemplar_Pain_Map.md
Landing-page test w/ pre-committed threshold	M04	TurbineTrack	Exemplar_Landing_Page_Test.md
Objection log → offer change	M08/M09	TurbineTrack	Exemplar_Objection_Log.md
GPK scorecard (verdict: PIVOT)	M07	Klausurly	Exemplar_GPK_Scorecard.md
The A-grade kill autopsy	M07→Demo Day	Klausurly	Exemplar_A_Kill_Autopsy.md

Read the kill autopsy even if you never kill: it’s the clearest picture of what “evidence quality + decision discipline” means when graded.
