Sono Motors: 21,000 Reservations and a 50-Day Test

Updated: 2026-10-30.

MODULE 00 · KICKOFF · CASE, READ AT HOME THIS WEEK

Case for Module 00, Kickoff, of Ambitious Entrepreneurship. Prepared by Bastian Burger from public sources as a basis for class discussion. The case does not judge whether any decision was right or wrong. Licensed under CC BY-NC-SA 4.0 except third-party material as marked.

On 8 December 2022 Laurin Hahn and Jona Christians, co-founders and co-chief executives of Sono Motors in Munich, published a statement on the future of the Sion, the solar-electric passenger car at the centre of their company.[1] About 21,000 private customers had reserved a Sion, with an average down payment of about EUR 2,000 each.[2] Raising equity had become harder and more dilutive. “Raising money takes much longer than expected,” the founders wrote, “since we failed to explain to investors why the Sion has the potential to become the world’s first affordable solar-electric vehicle and that there is a huge demand for it.”[3]

“One view in the investment community,” they went on, “is that we should focus on our capital-light, revenue-generating solar business and abandon the Sion program.”[4] Before making any decision to stop the Sion, the founders called on reservation holders and potential new customers[5] to put up money equal to 3,500 fully paid Sions within 50 days, to be paid only if the campaign succeeded.[6] “If we cannot complete the campaign,” they wrote, “we intend to focus on our attractive solar B2B business, which is significantly less capital intensive.”[7] B2B stands for business-to-business.

The campaign, called #saveSion, was meant to fund most of the Sion program[8] and, in the company’s words, to let customers “prove with their down payments that the Sion is the solution for them”.[9] The decision on the car itself was still to come.

A Car With Solar Cells

Hahn and Christians started the business in a garage in Munich in 2012. The company was incorporated in 2016 together with Navina Pernsteiner, who by November 2021 was no longer part of its management but remained a shareholder.[10] Its car, the Sion, had solar cells integrated into the body.[11] In September 2022 the company gave its expected net price as EUR 25,126 and said the Sion “has the potential to become the world’s first Solar Electric Vehicle (SEV) for the masses”.[12]

By December 2022 the founders reported that the company had raised more than EUR 330 million since 2016.[13] The results presentation of 8 December counted about EUR 44 million of this as paid reservations as of 30 November 2022.[14] The holding company, Sono Group N.V., had listed its shares on Nasdaq in November 2021.[15]

Next to the car, Sono Motors built a solar business that integrated its solar technology into other companies’ vehicles. The founders wrote that 23 companies were piloting it “on a variety of fleet vehicles such as buses, trailers, and electric transporters”.[16] The results presentation counted “12 non-binding LOIs and 16 purchase orders / contracts signed and/or products delivered” for these customers, LOIs being letters of intent.[17] Revenue from the solar and digital businesses was EUR 138,000 in the third quarter of 2022.[18]

Counting Demand, 2016 to 2022

Sono Motors asked customers for different kinds of commitment over the years (Exhibit 1).

In the summer of 2016 the company ran a crowdfunding campaign on Indiegogo with a goal of EUR 150,000, which it passed. Supporters could put down a EUR 500 refundable deposit on a car or a EUR 2,000 pre-order with a 5 percent discount. First deliveries were then planned for "as soon as 2018".[19] The totals reported for the early campaigns differ. A company press release of September 2017 said Sono Motors had acquired more than EUR 850,000 through crowdfunding in 2016.[20] In April 2017 Hahn put the money raised from supporters so far at more than EUR 500,000 "on different channels".[21]

In the same interview Hahn said, "We now have over 1,000 non-binding pre-orders for the Sion, which clearly shows us that this car addresses a large market."[22] The company presented the Sion at the Munich Technology Center in July 2017, with a range of 250 kilometres and a price of EUR 16,000 excluding the battery.[23] In September 2017 its chief financial officer, Martin Sabbione, said, "Our target is to acquire 5,000 reservations, to strengthen Sono Motors' position vis-à-vis system suppliers." By then 2,000 reservations had been acquired, according to the company.[24]

In June 2018 the company reported more than 5,000 reservations and stated "that down payments have already been made for each of these vehicles and several hundred cars have already been paid in full". Production was then scheduled to start in the second half of 2019.[25] By October 2018 it reported more than 8,000 "fee-based vehicle reservations" and said it had "comfortably exceeded its original target of 5,000 reservations". Series production was then scheduled for the fourth quarter of 2019.[26] In May 2019 the count stood at 10,000, and the company said the number of paid preorders had doubled since June 2018. Production was then set for the second half of 2020.[27]

On 1 December 2019 Sono Motors launched a community funding campaign with a target of EUR 50 million, "2,000 vehicle preorders to be generated in four weeks". The announcement moved the production of the first vehicles to September 2021.[28] By the end of 2019 about EUR 33 million had come together, which the electric-car site ecomento called too little. After a community vote the company extended the campaign to 20 January 2020, and in the new year existing investors committed EUR 10 million.[29] In January 2020 the company announced that EUR 53 million had been invested over 50 days, "around 75 percent" from Sion reservation holders, 19 percent from existing and new investors and around 6 percent from loans and donations. It then counted 13,000 reservations.[30] The results presentation of December 2022 listed "€53m in payment commitments" as the result of the 2019 campaign and "€45m in net payment commitments (w/o VAT)", gave "approx.10,600 reservations with down payments" as a separate highlight, and noted "Challenge: 30 days extended to 50 days".[31] The company's accounts for 2020 recorded additions of EUR 30.6 million to advance payments received from customers.[32]

The reported count passed 16,000 in November 2021 and reached about 21,000 by the end of November 2022. The reported average down payment was USD 3,000 in November 2021 and about EUR 2,000 in September 2022, described as net, and in November 2022 (Exhibit 1). The company guaranteed a net price of EUR 21,400 to the first 16,000 reservation holders and set EUR 23,900 net for later ones.[33] Its registration statement for the Nasdaq listing warned that "In November 2021, we increased the net sales price for the Sion, which may negatively impact demand for the Sion and our reputation."[34] By June 2022 the purchase price in the company's reservation terms was EUR 29,900, including German VAT.[35] The expected net price was EUR 25,126 in September 2022, and the results presentation of December 2022 applied a net price of EUR 25,100 to reservations after the 18,500th.[36] The start of production moved several times (Exhibit 2).

In its filings the company described the reservations as evidence of demand. “The traction we have gained among potential customers is evidenced by a significant number of pre-orders,” the registration statement said, “which we believe provides commercial validation of our model and revenue momentum.”[37]

What a Reservation Was

A reservation was a contract under the company’s general terms and conditions for vehicle reservations. In the version of 30 June 2022, “The price paid for the reservation will be credited, in full, to the purchase price of the vehicle”, and “Through the reservation-process, there shall be no entitlement to the delivery of a vehicle.” A customer could withdraw within 14 days without giving reasons. After that a customer could still rescind, among other cases, if he or she decided not to enter into the sales contract when Sono Motors offered it, or if Sono Motors had not offered a sales contract by 31 December 2023.[38]

As of 30 November 2022 the company had “approximately 21k Sion reservations with an average down payment of approximately EUR 2k per reservation”. It put the potential net sales of these reservations at about EUR 463 million, “assuming all reservations actually result in sales”.[39] Of the advance payments it held on 30 September 2022, measured by nominal value, 24.9 percent could be cancelled at that time, a further 53.2 percent from 1 January 2023, 14.8 percent from 1 July 2023 and 7.0 percent from 1 January 2024.[40]

No customer had signed a binding purchase agreement. “To date, none of our customers has entered into a binding purchase agreement with us for our vehicles,” the company’s half-year report filed on 7 December 2022 said, “and we do not expect binding purchase agreements to be signed, at the earliest, until one year prior to the expected delivery date of a vehicle to the relevant customer.”[41] “In the event of a customer’s cancellation,” the report went on, “we are obligated to refund any advance payments already paid in connection with the reservation.”[42] The annual report for 2021 had stated that “there is no assurance that reservations will ultimately result in the purchase of a vehicle or that we actually realize our revenue expectations.”[43]

Business customers had placed B2B pre-orders of a different kind. As of 1 December 2022 the company counted about 22,000 of them, among them a letter of intent by FINN, a Munich-based car subscription platform, for 12,600 Sions. “Pre-orders are non-binding and no down payments have been made,” the results presentation said.[44] FINN and Sono Motors had signed the letter of intent in September 2022.[45]

Exhibit 3 sets out the forms of demand evidence side by side.

December 2022

Sono Group N.V. reported a loss of EUR 104.5 million for the first nine months of 2022. Its third-quarter report listed among its risks that its losses “raise substantial doubt about our ability to continue as a going concern”.[46] The company gave its current and expected liquidity as EUR 55 million, the founders’ statement as “$55 million”.[47] On 7 December the company had filed a registration statement for an at-the-market share program of up to USD 135 million and agreed to sell

convertible debentures of up to USD 31.1 million.[48] The founders called #saveSion "our non-dilutive solution for funding the majority of the Sion program and the first part of a broader funding strategy for the next 12 months, which includes of course the capital markets."[49]

The company's German campaign page of 8 December gave the founders' account of the advice they had received. "Our advisers tell us not to build the car, to restructure the company and to lay off 70% of our employees," it said. "The reservation holders will be compensated, the Sion and the community shunted aside." The founders' answer followed. "But for us, that is simply not an option. Not without giving our community the chance to have a say. That is why we started this campaign."[50] The English version of the page, as captured on 9 December, attributed the same advice to investors.[51]

The campaign asked for "an upfront payment equivalent of 3,500 Sion full price payments", which the company expected to bring in EUR 100 million, about EUR 84 million net of VAT.[52] Early participants were offered a discount of up to EUR 3,000 on the vehicle's final price. "Payments must only be made in the event the campaign is successful," the founders wrote, and supporters could receive a fixed waiting-list number.[53] On the day, the business newspaper Handelsblatt described the campaign as asking 3,500 customers to prepay "a discounted purchase price of 27,000 euros" in full, without saying whether that figure included VAT.[54] Existing holders could increase their down payment, and "even if you increase your reservation by EUR 100, it brings us closer to the campaign goal". New customers could place a new booking.[55] Loans, gifts and social-media posts were also welcome.[56] "Your down payment represents your trust in us and your demand for the Sion," the German page told supporters.[57]

The results presentation of the same day had a slide headed "How we tell the story". Under "The simple message we give to our community" it read, "21,000 people have reserved the car. The vast majority of these people plan to pay the full price as soon as they expect to get the vehicle. So now, we ask them to give us some of this money 12-18 months earlier in order to start the production of their car."[58]

The founders believed that the company's liquidity and resources would allow it "to successfully pivot to 'solar only'" if the campaign could not be completed.[59]

Fifty Days

On 8 December 2022 about 21,000 people held a reservation for a Sion, with about EUR 44 million of down payments between them. None of them had signed a binding purchase agreement, and the company did not expect anyone to sign one before a year ahead of delivery. About 22,000 B2B pre-orders carried no money at all. The campaign asked for money equal to 3,500 fully paid cars within 50 days, to be paid only if the campaign succeeded.

Hahn and Christians had said what they intended to do if the campaign could not be completed. What a full success, a narrow miss or a clear miss would say about the demand behind the reservations, and what each should mean for the Sion, remained to be decided.

Exhibit 1: Sion Reservations as Reported by Sono Motors, 2017 to 2022

As of	Reservations reported	What the company said about money	Value if all became sales, in the company's term	Note
April 2017	more than 1,000	"non-binding pre-orders" (translated)	not stated	60
September 2017	2,000 (target 5,000)	not stated	not stated	61
June 2018	more than 5,000	down payments made for each, several hundred cars paid in full	turnover of more than EUR 100m	62
October 2018	more than 8,000	"fee-based vehicle reservations"	order volume of about EUR 140m	63
May 2019	10,000	paid preorders doubled since June 2018	turnover of EUR 214m	64
January 2020	13,000	EUR 53m invested in the community campaign	not stated	65
January 2021	more than 12,600 pre-orders	not stated	not stated	66
April 2021	13,000 private	average down payment EUR 3,000	total order value EUR 278m	67
October 2021	more than 15,000	average down payment USD 3,300	total order value USD 385m (EUR 321m)	68
November 2021	more than 16,000	average down payment USD 3,000, net cash inflows EUR 40.8m	net sales volume of about EUR 340m	69
March 2022	more than 17,000	average down payment EUR 2,390 net, net cash inflows EUR 40.9m	net sales volume of EUR 368m	70
September 2022	more than 20,000	average down payment about EUR 2,000 net, net cash inflows about EUR 43m	net sales volume of about EUR 435m	71
November 2022	about 21,000	average down payment about EUR 2,000, paid reservations about EUR 44m	net sales volume of about EUR 463m	72

Source: Sono Motors press releases, an interview and filings, one note per row. All figures as reported by the company and not independently verified. "Net cash inflows" as defined in the company's filings. The counts mix private reservations and pre-orders as each source named them. Where the source does not say, the cell says "not stated".

Exhibit 2: Start of Production and Price of the Sion as Announced, 2016 to 2022

Announced	Start of production or first deliveries	Price as announced	Note
September 2016	first deliveries “as soon as 2018”	not stated	73
September 2017	not stated	EUR 16,000 excluding battery, VAT basis not stated	74
June 2018	production in the second half of 2019	not stated	75
October 2018	series production in the fourth quarter of 2019	not stated	76
May 2019	production in the second half of 2020	not stated	77
December 2019	first vehicles in September 2021	not stated	78
January 2021	not stated	estimated gross price EUR 25,500	79
October 2021	not stated	EUR 21,400 net, then EUR 23,900 net after the first 16,000 reservations or from 15 November 2021, whichever came first	80
November 2021	deliveries from the first half of 2023	not stated	81
April 2022	series production in the second half of 2023	not stated	82
June 2022	not stated	EUR 29,900 including German VAT in the reservation terms	83
December 2022	pre-series production in 2023, start of production in the first quarter of 2024	EUR 25,100 net for reservations after the 18,500th	84

Source: Autoblog (2016), Sono Motors press releases (2017 to 2022), Sono Group N.V. filings, the founders’ statement and the results presentation of 8 December 2022, and the reservation terms of 30 June 2022, one note per row.

Exhibit 3: Sono Motors' Demand Evidence as Reported by 8 December 2022

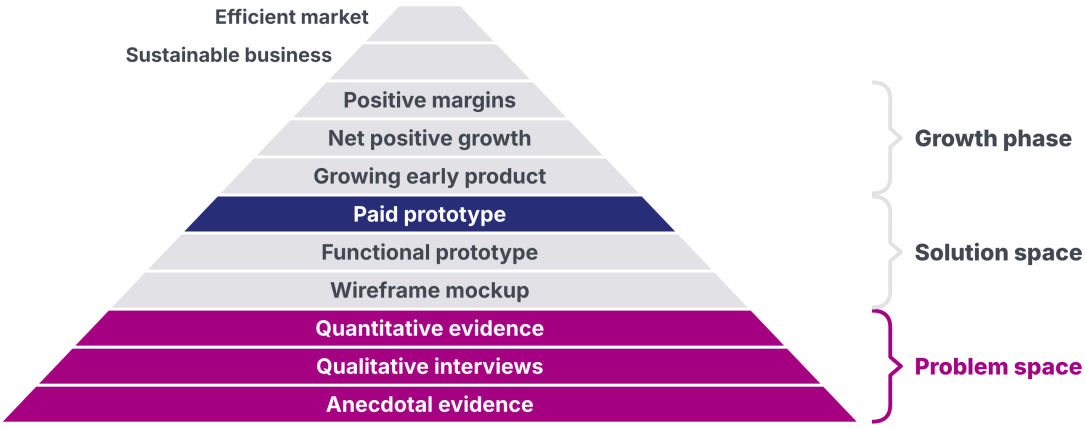

Evidence	As of	Number	Money	Binding	Refundable	Note
B2B pre-orders	1 December 2022	about 22,000, including a non-binding letter of intent by FINN for 12,600	"no down payments have been made"	"non-binding"	nothing paid	85
Private reservations	30 November 2022	about 21,000	average down payment about EUR 2,000, paid reservations about EUR 44m	no entitlement to a vehicle (terms of 30 June 2022)	on withdrawal within 14 days or on rescission (terms of 30 June 2022)	86
#saveSion	8 December 2022	the equivalent of 3,500 fully paid Sions, about EUR 100m gross	to be paid only if the campaign succeeds	not stated in the company's documents	not stated in the company's documents	87
Binding purchase agreements	7 December 2022	none signed, none expected until one year before delivery	not applicable	yes	not applicable	88

On 30 September 2022, 24.9 percent of the advance payments by nominal value could be cancelled at that time, a further 53.2 percent from 1 January 2023, 14.8 percent from 1 July 2023 and 7.0 percent from 1 January 2024.[89]
